

RANGIROA WORLD DIVER AUTOMATIC GMT

USER MANUAL

SCREWING OF THE CROWNS

To ensure maximum water resistance to your RANGIROA WORLD DIVER timepiece, the crowns at 3 o'clock and 6 o'clock are screwed in during normal operation of the watch. Screwing the crowns back on is necessary after each manipulation to keep your watch waterproof and ensure normal operation.

SETTING THE TIME

- 1 Unscrew the main crown located at 3 o'clock.
- 2 Pull the crown out to the 2nd peg
- 3 Turn the crown to rotate the hands to the chosen time
- 4 Screw the crown back on

SETTING THE DATE

- 1 Unscrew the main crown located at 3 o'clock.
- 2 Pull the crown out to the 1st peg
- 3 Rotate the crown upwards until the selected date is displayed
- 4 Screw the crown back on

CAUTION It is strongly recommended not to change the date when the main time is between 9 p.m. and 3 a.m. Place the hands in another position and adjust the date to avoid any damage to the mechanism

SECONDARY TIME ZONE SETTING

- 1 Unscrew the main crown located at 3 o'clock.
- 2 Pull the crown out to the 1st peg
- 3 Turn the crown downwards until the selected time is displayed on the inner bezel graduated over 24 hours
- 4 Screw the crown back on

OBTAINING THE TIME ZONE CORRESPONDING TO A DESTINATION

- 1 Unscrew the secondary crown located at 10 o'clock.
- 2 By turning the crown, select the desired location which is displayed in the window located at 12 o'clock on the dial
- 3 The corresponding time zone is displayed in the window located at 6 o'clock on the dial
- 4 Screw the crown back on
